About me

I am a first year BioNatSci student from Brighton. Alongside my studies, I spend a lot of time playing sports and going to societies. I have represented both Peterhouse and the University at football, something which I love. I entered the University Challenge trials for Peterhouse, and am in the process of organising a quiz team with my friends. I regularly attend the University Poker Society, and have also attended the Peterhouse Board Games Society. I am also keen to join the university's running society. Having grown up loving sports, and having captained my school in both football and cricket, I have experience in running sports clubs and understand the importance in making sure everyone is involved, and is having fun, be it sports or societies.

Aims

- To carry out a survey to discover the demand for potential new societies.
- To liaise with other Colleges in order to form merged societies/sports clubs where numbers are short.
- To provide a platform for sport team captains to upload brief match reports and fixtures for everyone to see.
