

AMALS Committee Manifesto

AMALS President

Zach Harper

Hi everyone - I'm Zach, a second year Chemical Engineer and I think I'd be a good choice as our AMALS president for several reasons. I have plenty of experience with our college's sports, from playing rugby and football since last year to joining in with rowing and mixed netball this year. I am also involved in boxing with the University club and this variety in exposure highlights my commitment to getting people involved in different activities, which I think is helpful for the position of AMALS president. This year I have captained the Peterhouse men's football team and am also a committee member of the Chemical Engineering University society, meaning I am very comfortable ensuring clubs and societies are organised for the benefit of the members. Moreover, it has improved my ability to take comments from people and to use them to improve the club or society I am involved in running. Along with my prospective AMALS committee colleagues Joe and Eytan, I am keen to support our college's clubs and societies and to improve the way this system is organised - along with the variety of opportunities available - with the help of our fellow students.

AMALS Treasurer

Eytan Cortissos

I'm Eytan and I'm a second year Engineer. As the current treasurer of our Boat Club, I know how to deal with budgets, management accounts, etc. And most importantly, I know the people and the ins and outs concerning reimbursements with College. In the past, people have had to wait for weeks or even longer to get their money back after having bought something for their club or society. However, the college generally enables us to get payments reimbursed within a week's time, so as treasurer I will do everything to get that done. Besides, having been involved with multiple sports clubs and societies both in college and uni-wide, I know the kind of issues that can arise within societies and committees. Apparently I'm comfortable with adding and subtracting numbers as well.

AMALS Secretary

Joe Winterburn

I'm Joe, and I'm a second year Phys NatSci. I'm also currently the Captain of our Boat Club, so have gained lots of experience working alongside the committee to run one of Peterhouse's sports clubs. I therefore have experience communicating with lots of people, and working closely with the college, which I believe I could bring to this role. I have experience working with online technology and would like to incorporate this to make it easier for people to communicate with the AMALS committee, whether it be for reimbursements or for support in starting a new society. I would also like to use these skills to increase the awareness amongst the members of the college about how well our societies - be it sports teams, drama societies or otherwise - are doing, as at the moment there is no way of seeing the achievements of our fellow Petreans.
